TO BUILDERS, PLUMBERS, AND FITTERS.

UNDER the SANCTION of the BOARD of HEALTH.—The undersigned is manufacturing complete POTTERY WATER-CLOSETS, and also SELF-SCULPING and DISCHARGING FOUNTAIN BASINS, for the use of public buildings and private dwellings, of a most economical, durable, and cheap description. He is now prepared to treat with parties who have the means, hands, and connections to make an extensive trade in this way. None but respectable parties need apply, and a reference will be expected. The above applies to London and its vicinity, and to all places where the Health of Towns Bill is about to be introduced, as well as to all large towns in the United Kingdom.—JOHN BIDOWAY, Cambles-place, Staffordshire Potteries.

TO ARCHITECTS, BUILDERS, &c.

ATTENTION is requested to the DIRECT ACTION BALL TAPS, invented and patented by T. H. THOMPSON, C.E.

In these Taps the old-fashioned lever is done away with, whose dancing action whilst the water was being admitted, soon wore out the cone, and rendered the cock unsound.

The Direct Action Ball Taps cannot slop up or down, thereby either flooding or leaving premises with no water; a fault which all similar contrivances possess in an eminent degree.

They will fill a reservoir in less time than any other tap of similar dimensions, on account of the water-way at the valve-hole's being open till the water in cistern is within one inch of the required level, when they shut off without possibility of leakage.

The perpendicular principle, with compensating valve inside, renders the action unerring and perfect under any pressure whatever.

Specimens can be seen in action at the office; and all necessary information, with drawings, forwarded by application to T. H. THOMPSON, C.E., 21, Parliament-street, Westminster.

MANUFACTURERS of GLAZED STONEWARE PIPES, Bends, Junctions, &c., also FIRE BRICKS, Vitrified Blue Bricks as used by her Majesty's Commissioners of Sewers, Water Fire Clay, Patent Bricks, &c., &c. Agents.—Messrs FREEMAN and RICHARDSON, No. 6, South Wharf, Paddington, London; Mr W. RAWLINS, Seamor Wharf, Camden town; and Messrs HERTSLET and Co., Adelphi Wharf, Strand.

IMPROVED DRAINAGE.
BY ROYAL LETTERS PATENT.

STANDING, FRANKLIN, & STANDING, Sole Patentees and Manufacturers of the PATENT GLAZED STONE WARE SEWAGE PIPE. Offices, 31, Cornhill, entrance by Change-alley; Factory, Brunton's Wharf, Commercial-road, Limehouse.

By employing their patent machinery, S. F. and S. are enabled to produce a pipe for sewage and other purposes in every way far superior to those made by any other process, but more especially in those qualities so absolutely essential to a perfect, and cleanly mode of drainage. From the great and uniform amount of pressure, and special construction of the machinery (allowing the air to escape) used in manufacturing, their pipes are entirely free from air bubbles, giving their greater strength, durability, and entirely preventing the materials permeable through; they are much smoother on the inside, insuring a perfect passage for the sewage, and preventing any deposit.

STRAIGHT TUBES WITH SOCKET JOINTS, BENDS, JUNCTIONS, TRAPS, CLOSET PANS, Water Pans, and Chemical Pipes, Architectural Ornaments, Vases, Chimney Pots, &c. Shipping and Export orders executed to any extent.

Specimens may be seen at the offices, 31, Cornhill, where prices, &c., may be obtained, and licenses granted for the use of the patent machine.

CHEAP WATER-CLOSET PANS,
with Syphon Traps,
IN GLAZED STONE WARE.
PRICE 7s. 6d. EACH.

The improved WATER-CLOSET PANS are of the most simple yet perfect construction, they are CLEANLY and IMPERISHABLE features so essential, and the price at which they are offered is so low, as to admit of their universal adoption.

JAMES STIFF, MANUFACTURER of GLAZED STONE WARE DRAIN PIPES,
BENDS, JUNCTIONS, TRAPS, &c., 35, HIGH STREET, LAMBETH, LONDON. Established 1751.
Water Closet Pans, with Syphon Traps, 7s. 6d. each.
STRAIGHT TUBES, with Socket Joints, 1s. 1 foot lengths.

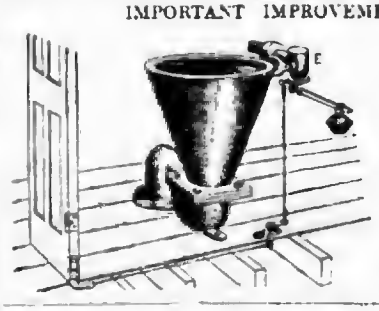
N.B. These are made without the Anchorage before being turned down.

The great advantages attending the use of these articles are now so generally understood, as to render any enumeration of them almost superfluous. Their great cheapness, efficiency, and durability, are universally admitted, while the rapidly increasing demands for them prove their estimated superiority over every other kind hitherto before the public for similar purposes.

Inspection is invited to an extensive stock of Drain Tubes of every form and size, adapted to the various situations for which they may be required, as also to the WATER-CLOSET PANS OF IMPROVED CONSTRUCTION, and to other articles manufactured of Brown Stone Ware.

May be had also at Messrs. GLADDISH'S LIME WHARF, Pedlar's Acre, Westminster-bridge; City-road Wharf, City-basin, Islington-road, Bermondsey; Deaver's Wharf, foot of Battersea-bridge, Chelsea; Peak Wharf, Kingsland, Hackney New Town.
Drawings and List of Prices will be forwarded on application.

IMPORTANT IMPROVEMENT IN WATER-CLOSETS.



The annexed close-action apparatus, suitable either for public buildings or private property, is a

CHEAP AND EFFECTIVE MODE OF INSURING THE USE OF WATER,

(other arrangements—and surprising, by pressure of the seat, or to lift with a handle, as the ordinary cocks may be seen at the manufactory.

The valve, patent rubber E of large diameter, but lever weight, as I handle, are all fixed together with bolts and nuts, and are (a washing) strong and durable, and may be fixed at a very small cost.

The price, complete, is only 2s.

SUPERIOR GLAZED STONEWARE DRAIN PIPES,
Invented and manufactured by
WILLIAM NORTHEN, UNION POTTERY, No. 24, VAUXHALL WALK, LAMBETH.

W. NORTHEN begs to inform surveyors, engineers, builders, water companies, &c., that he has completed Machinery, and patent machinery for making GLAZED STONEWARE DRAIN PIPES, JUNCTIONS, BENDS, ELBOWS, SYPHON TRAPS, &c. &c. Amongst the many advantages of pipes made by this machinery over all others now in general use, that of insuring perfectly straight barrels, and of a uniform bore throughout, the true boring of a different as before constructed, both are effected by the same simple and certain means by the process and machinery for the first time introduced.

W. N. solicits particular attention to the superior quality of the glaze used in his manufactory, which is applied in a manner peculiarly its own, thereby preventing the possibility of the glaze chipping off, as is frequently the case with pipes glazed in the ordinary way. CLOSET PANS, with the new and most improved self-acting valve. W. NORTHEN'S PIPES MAY BE INSPECTED AT THE FOLLOWING PLACES WHERE AGENTS ARE RESIDENT:—
